

Dry Ice pellet-to-slice reformer YGCX-4000

The Magicball YGCX-4000 Dry ice pellet-to-slice reformer make the small particles dry ice to be compressed into small pieces of dry ice 450 times per hour can be compressed, the production of dry ice is mainly applied to low temperature preservation and transportation industries.

Specification:

Motor Power(kw)	11	Dry Ice material Size (mm)	3*(1-10)
Dry Ice Size (mm)	9-95*95*(10-60) 6-125*105*(10-60)	Exhaust pipe diameter (mm)	DN70
Dry Ice Size(inch)	9-3.8*3.8*(0.4-2.4) 6-5.0*4.2*(0.4-2.4)	Fuel tankage (l)	180
Min-Max (kg/h)	900-1200/800-1100	Overall Dimension(cm)	220*130*185
Raw Materials(t/m ³)	≥1.5	Weight (kg/lbs)	1900/4180
CO ² Transformation rate	≥98%
