

Magicball Dry Ice Blasting Machine YGQX-750

The Magicball YGQX-750 Dry ice blasting machine cleaning with dry ice! This new development is quickly expanding around the world. One system uses small rice size pellets of dry ice shooting them out of a jet nozzle with compressed air. It works some what like sandblasting or high-pressure water or steam blasting, with superior results. The frigid temperature of the dry ice is -78°C.

When the rice-sized pellets are blasted against a surface, they disintegrate and change to carbon dioxide gas. The mould, along with other debris, becomes airborne and later falls to the ground.

Specification:

Motor Power(kw)	0.75	With Ice(kg/min)	0-2.0
Dry Ice Size (mm)	1-4	Hooper Capacity(l)	25
Dry Ice Size(inch)	0.1-0.16	Air hose length(m)	9
Voltage(vac)	220	Connector Screw Thread(")	1
Air Supply Pressure Range(mpa)	0.5-1.0	Ice Blater hose Length(m)	7
Air Supply Pressure Range(bar)	5-10	Weight(kg/lbs)	95/209.44
Air Consumption(m ³ /min)	3-6	Overall Dimension (cm)	100*48*120
Air Consumption(cfm)	107-214
